

## CODE COMPOSITION: CT025AK16L \_ T M \_

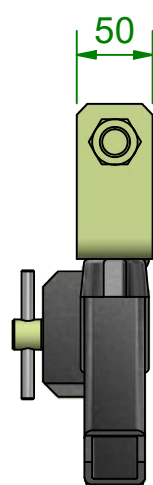

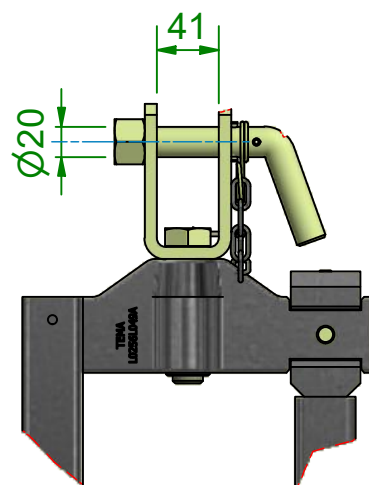

N = Nylon sectors  
A = Aluminium sectors

T = 360° turnable clevis

M = Reinforced pulley (w.l. 60 kN)

O = No grounding sheave  
T = With grounding sheave

T = 360° turnable clevis

## SINGLE PULLEY-BLOCK

Moulded aluminium alloy sheave, on ball-bearings mounted, interchangeable nylon/aluminium lining sectors for protection bottom groove. Galvanized steel frame with clevis swivel attachment

\*Total weight includes grounding sheave

|                                                                                                                                                                        |            |               |             |                                   |  |                   |                                              |                          |                  |
